

# Dallas Waldrop

Dallaswaldrop@gmail.com ❖ (919) 451-1357 ❖ Toledo, OH

Software Developer with over 10 years of experience designing and implementing full-stack software solutions to optimize complex business workflows.

## WORK EXPERIENCE

---

### Porch Software

Jan. 2025 – Mar. 2026

*Software Developer II*

*Draper, UT | Remote*

- Delivered ~150 tickets across 10+ carrier integrations within the Edward Jones e-application platform, including Lincoln Financial, Prudential, Pacific Life, Nationwide, Protective, Banner Life, and Penn Mutual.
- Owned end-to-end Banner Life integration from scratch: .NET Core submission API, authentication, payload data structures, mock server, and React/Vue UI across all policy, owner, and beneficiary sections.
- Built carrier submission and notification pipelines against ACORD XML (TX103, TX191, TX1125, XML121), including the Holds & Releases workflow, SFTP status feeds, and a branch-team email notification system spanning approved/held/disapproved states.
- Authored unit tests across core .NET services (LifeApps, PRU, PML, NW, AccountManagement) and resolved high-priority cross-carrier production bugs in a TypeScript/React + .NET Core stack.

### Hamilton Manufacturing

Feb. 2022 – Jan. 2025

*Software Engineer*

*Holland, OH*

- Refactored legacy systems to newer .NET frameworks, enhancing system performance and maintainability.
- Designed and developed an Azure Message Queue-based messaging system for sending SMS, email, and Firebase push notifications, improving communication efficiency.
- Uses Azure Data Factory pipelines for archiving data to Azure Databricks and Azure Synapse Analytics.

### Independent Consultant

Jan. 2020 – Feb. 2022

*Consulting for Multiple Clients*

*Toledo, OH*

- Created an ASP.NET MVC based web application that functioned as a provider directory for Mental Health Services in the state of North Carolina. Deployed functional demo version to Microsoft Azure.
- Collaborated with clients to gather requirements and deliver customized software solutions using C#, .NET, and Azure services.

### iBridge Group

Nov. 2012- Apr. 2017

*Software Developer*

*Austin, TX*

- Developed stored procedures, views, indexes, and scripts for database transactions using SSMS.
- Created data access and business logic layer classes using C# and .NET Framework for Kofax and KTA applications.

## EDUCATION

---

### University of South Alabama

Dec. 2019

*Master of Computer and Information Science*

*Mobile, AL*

### University of North Carolina at Chapel Hill

Dec. 2010

*BA Comparative Literature*

*Chapel Hill, NC*

## SKILLS

---

- **Programming Languages:** C#, SQL, TypeScript, JavaScript, Python.
- **AI & Developer Tooling:** Claude Code CLI, GitHub Copilot, custom Claude API pipelines for Jira and Bitbucket automation; enthusiastic early adopter of AI-augmented development workflows.
- **Web Technologies:** React, Vue, TypeScript, ASP.NET MVC, HTML, CSS.
- **Cloud Platforms:** Microsoft Azure (Azure Message Queue, Application Insights, Data Factory, Databricks).
- **Other:** Database normalization, ERD design, database migrations, logging and monitoring, software testing, ACORD XML, SFTP.
